Product Overview

Precision Cross Slide Vice

This precision-engineered machine vice is designed for versatile use in milling, drilling, and shaping operations. Featuring a robust cast iron construction with hardened and ground jaws, it ensures secure workpiece clamping for demanding machining tasks. The integrated cross slide mechanism allows for precise X-Y axis adjustments, significantly enhancing machining accuracy and versatility for both metalworking and woodworking applications.

Technical Specifications

Compatible Machinery

- Drill presses
- Milling machines
- General machine tools

Adjustment Axes

2 X-Y

Axes Movement

Body Material

Precision cast iron

Key Features

Cross slide mechanism, Hardened and ground jaws, Smooth-operating lead screw, Adjustable gibs, Swivel base
