

CRT Display

CRT displays are used to show alphanumeric characters and symbols. They are commonly used in applications where simple text-based information needs to be presented.

Product Overview

Professional Grade Field Markers

These CRT displays are designed as high-visibility vertical markers for outdoor recreational and professional landscaping environments. Featuring a durable two-toned construction with a flexible upper section, they provide reliable guidance while maintaining safety and resilience. The markers are evenly spaced and engineered for easy installation in grassy terrains, making them ideal for golf courses and similar large-scale outdoor facilities.

Design & Construction

Visual Design	Slender, vertical poles with a two-toned color scheme
Material Flexibility	Flexible darker top section for enhanced durability and safety
Base Type	Rigid lighter-colored bottom section for ground stability

Application & Environment

Recommended Applications	Golf Courses, Recreational Areas, Field Marking, Outdoor Landscaping
Terrain Compatibility	Optimized for well-maintained grassy areas and sloped outdoor settings
