

CRT Monitor

This CRT monitor utilizes cathode ray tube technology to display images. It features a standard interface for connecting to compatible devices.

Product Overview

Classic CRT Display Technology

This cathode ray tube (CRT) monitor offers a reliable display solution featuring a distinctive two-tone design with a dark bezel and a white lower control section. The unit is built for durability with integrated side ventilation to ensure stable performance during extended use. Its adjustable black stand and reflective base provide a sturdy foundation for professional or legacy computing environments.
