

CRT Television Circuit Board 25-29 Inch

Circuit board designed for use in 25-29 inch CRT televisions. It incorporates capacitors, resistors, integrated circuits, transformers and connectors for signal input/output.

Product Overview

Universal CRT Television Circuit Board

This universal circuit board is designed specifically for the maintenance and repair of 25 to 29-inch CRT televisions. It serves as a comprehensive replacement solution, ensuring compatibility with standard television chassis configurations. Engineered for reliability, this board integrates essential electronic components to restore functionality to legacy display systems.
