

Crushed Plastic Recycling Material

Collection of crushed and fragmented plastic waste, likely consisting of bottles and containers. The composition suggests use in recycling or waste management.

Product Overview

Crushed Plastic Recycling Material

This product consists of a dense collection of crushed and fragmented plastic waste, sourced for recycling or waste management applications. The material features a diverse mix of colors and shapes, representing various plastic types commonly found in post-consumer streams. It serves as a raw feedstock for further processing and material recovery operations.

Material Composition

| | |
|----------------|--|
| Material Type | Mixed Plastic, Recyclable Waste, Post-Consumer |
| Physical State | Crushed and fragmented |
