

Crushing and Culling Machine

This machine is designed for crushing and culling. It is commonly used in industrial applications.

Product Overview

High-Efficiency Electric Kettle

This electric kettle is engineered for rapid boiling, making it an ideal choice for high-demand home or office environments. Constructed with a high-quality stainless steel body, it offers a professional appearance combined with long-term durability. The design prioritizes safety and precision with a heat-resistant handle and a specialized spout for controlled pouring.

Design & Build

Body Material	Stainless Steel
Handle and Base Material	Black Plastic
Design Style	Sleek Appearance, Durable Construction, Professional Finish

Operational Features

Performance	Rapid Boiling
Pouring Control	Integrated spout for precise pouring

Application

Suitable Environments

- Home Use
- Office Use
