

CTM14 Concrete Mixer Truck

The CTM14 concrete mixer truck is designed for efficient concrete transportation and mixing. Its high-capacity mixing drum ensures thorough and consistent concrete mixing during transit.

Overview

High-Capacity Concrete Transport Solution

The CTM14 is a robust concrete truck mixer engineered for high-efficiency transportation and consistent mixing on large-scale construction sites. Featuring a 14 cubic meter drum capacity and a powerful hydraulic system, it ensures homogenous concrete quality even during long transits. Designed for durability and stability across various terrains, this machine provides a reliable solution for demanding professional concrete delivery needs.

Technical Performance

The CTM14 features a 14m³ drum designed for optimal mixing quality and reduced segregation.

Performance Highlights

14 m³

Mixing Capacity

Mixing Drum Features

- High-capacity mixing drum
- Optimized for reduced segregation
- Consistent mixture homogeneity
- Powerful hydraulic rotation system

Chassis & Mobility

Build Quality

- Durable heavy-duty chassis
- High-performance engine for varied terrains
- Enhanced stability for full-load transport

Operator Safety & Comfort

Safety Systems

Emergency Stop Buttons, Secure Access Platforms, Ergonomic Controls

Compliance & Quality

Compliance with ISO and CE standards ensures reliable and safe operation.

Standards & Certifications

ISO 9001:2015 • ISO 14001 • OHSMS 18000 • CE Certified • EN 60204-1 Compliance

Quality Assurance

Adheres to international standards for quality and environmental management systems.

Application

Proven performance in demanding construction environments and diverse terrains.

Recommended Applications

- Large-scale construction projects
- Commercial concrete supply
- Challenging terrain transit
- High-volume concrete delivery
