

Cup Base Paper Rolls

These are rolls of cup base paper used in the production of paper cups. The paper is white and wound into large rolls for industrial processing.

Product Overview

High-Quality Cup Base Paper

These premium cup base paper rolls are engineered specifically for the manufacturing of disposable beverage cups. Designed for consistent performance, this paper offers excellent structural integrity and moisture resistance, ensuring reliable cup formation during high-speed production. It is an ideal solution for manufacturers seeking high-quality raw materials for standard food-service packaging.

Material Specifications

Material Type	Cup Base Paper
Key Features	Moisture Resistant, High Structural Integrity, Industrial Grade

Logistics & Storage

Storage Format	Large Industrial Rolls
