

Cup Grinding Wheel for Surface Preparation

This cup grinding wheel is designed for efficient material removal and surface preparation. The wheel features a cup-shaped design for optimal grinding on flat surfaces and edges.

Product Overview

Professional Surface Preparation

This cup grinding wheel is engineered for efficient material removal and high-performance surface preparation. Featuring a specialized cup-shaped design, it provides optimal contact for grinding flat surfaces and edges on concrete, stone, and other hard materials. The abrasive surface is designed for fast cutting speeds while minimizing clogging to enhance overall productivity and reduce operational downtime.

Technical Specifications

Design Features

- Cup-shaped profile for flat surface grinding
- Fast-cutting abrasive surface
- Anti-clogging engineering
- Robust construction for durability

Compatible Materials

Concrete, Stone, Hard Materials

Usage

Suitable For

Professional Use • DIY Applications
