

Cup Grinding Wheel

This cup grinding wheel is designed for efficient material removal and surface preparation. It features durable construction with strategically placed segments for optimal grinding action and is suitable for concrete, stone, and masonry.

Product Overview

Professional Grinding Performance

This high-performance cup grinding wheel is engineered for efficient material removal and professional-grade surface preparation. Designed with a durable construction and strategically placed segments, it ensures an aggressive grinding action while maintaining a smooth finish. It is an ideal tool for demanding tasks in construction, renovation, and masonry surface finishing.

Technical Specifications

Application

Material Removal • Surface Preparation • Professional Use

Key Features

- Durable segment construction
- Optimized grinding action
- Aggressive material removal
- Professional-grade durability

Compatible Materials

Concrete, Stone, Masonry
