

# Cuplock Scaffolding Steel Plank

Steel plank designed for cuplock scaffolding systems. Features a galvanized finish for corrosion resistance and compatibility with standard cuplock components.

## Product Overview

### Robust Working Platform

This durable steel plank is specifically engineered for cuplock scaffolding systems, providing a secure and stable working platform for construction and industrial projects. Featuring a galvanized finish, it offers excellent corrosion resistance and long-lasting performance in demanding environments. Designed for compatibility with standard cuplock components, it ensures high load-bearing capacity for professional use.

## Technical Specifications

### Finish

Galvanized

### Material

Steel

### System Compatibility

Standard Cuplock Scaffolding Systems

## Application

### Primary Applications

Construction, Maintenance, Industrial

## Performance

### Key Performance Indicators

**1 High**

Corrosion Resistance

**1 High**

Load-Bearing Capacity
