

Currency Counter with Counterfeit Detection

This currency counter is designed for high-volume cash handling, featuring advanced counterfeit detection. It offers multiple counting modes and a user-friendly interface to enhance productivity.

Overview

Professional Currency Handling Solution

This high-performance currency counter is engineered for high-volume cash handling environments, such as banks and retail establishments. It utilizes advanced multi-sensor technology, including UV, MG, and IR detection, to ensure the highest accuracy in verifying banknotes. With a counting speed of 1000 bills per minute and a 300-bill hopper capacity, this device is designed to significantly enhance operational productivity and reduce processing time.
