

Currency Validation and Counting Device

This electronic device is designed for financial applications. It features a user interface with a display screen and a keypad for data input and control.

Product Overview

Professional Currency Validation and Counting

This advanced currency validation and counting device is engineered for high-volume financial environments. Designed as a robust, floor-standing unit, it offers mobility through integrated casters, allowing for flexible placement within cash handling centers. The intuitive interface features a clear display and tactile keypad, ensuring efficient operation for counting, sorting, and validating large volumes of currency.

Physical Characteristics

Form Factor	Floor-standing unit
Mobility	Casters, Mobile

Operational Features
