

Curved Blade Pruning Shear

This pruning shear features a curved blade design for clean and precise cuts on branches and stems. The high-carbon steel blade ensures durability, while ergonomic handles provide a comfortable grip.

Product Overview

Precision and Comfort for Professionals

These curved blade pruning shears are engineered for the demands of continuous, professional use in gardens and orchards. Featuring high-grade Japanese SK5 steel, the blades provide clean, precise cuts with every application. The ergonomic handle design, paired with a dedicated shock absorption system, minimizes hand fatigue during extended pruning tasks.

Technical Specifications

Blade Material	Japanese SK5 steel
Recommended Cutting Diameter	15 mm

Design Features

Handle Construction	Aluminium with orange PVC coating
Key Features	Curved Blade, Shock Absorbers, Precision Adjustment, Ergonomic Design

Performance Metrics

Performance Capacity

15 mm Max Cutting Diameter	5 mm Min Cutting Diameter
