

Curved Blade Tin Snips

These tin snips feature curved blades optimized for cutting sheet metal. Their durable steel construction and ergonomic handles provide comfortable and efficient cutting for HVAC, roofing, and metalworking.

Product Overview

Professional Performance

These heavy-duty curved blade tin snips are engineered for precision and durability in demanding metalworking environments. The design features high-leverage handles paired with ergonomic grips, ensuring comfort and reduced fatigue during extended use. Constructed from high-quality steel, these tools provide long-lasting performance for professionals in HVAC, roofing, and general metal fabrication.

Technical Specifications

Blade Shape	Curved
Material	Steel
Handle Characteristics	High-leverage, Ergonomic

Application Suitability

Primary Applications

- HVAC installation
- Roofing
- Sheet metalworking
