

Curved Glass Food Display Chiller

This display chiller features polyurethane integral foam for insulation and strength. It uses stainless steel in damp areas for corrosion resistance and easy cleaning, with electronic temperature control for accuracy.

Product Overview

Professional Food Display Solution

This curved glass refrigerated display case is engineered for the optimal presentation and preservation of deli products, meats, and cheeses. Featuring a high-quality stainless steel interior and a robust ventilated cooling system, it ensures consistent temperatures for food safety. The sleek design with curved glass maximizes product visibility, making it an ideal choice for supermarkets, delis, and restaurants.

Technical Specifications

Cooling Type	Ventilated cooling system
Control Method	Digital temperature control

Design & Construction

Interior Material	Stainless steel
Exterior Features	Curved glass, Red base, Gray side panels, Ventilation grilles

Features

Key Features

- Adjustable shelving
- Ventilated cooling for uniform temperature
- Digital temperature management
- High-visibility curved glass

Application

Recommended Use

Supermarkets • Delis • Restaurants
