

# Curved Glass Top Chest Freezer for Display

This chest freezer is designed for displaying frozen goods. It features a transparent curved glass lid, casters for mobility, and temperature control.

## Overview

### Professional Display Freezer

This curved glass top chest freezer is engineered for high-visibility product display in commercial environments like supermarkets and convenience stores. It features advanced thermal insulation with a stepped-maze cabinet design and heat-reflective tempered glass to ensure consistent cooling efficiency. Built for durability and ease of maintenance, the unit includes a robust PCM liner and a convenient drainage system.

## Design & Construction

<b>Glass Technology</b>	Heat-reflective coated tempered glass
<b>Interior Liner</b>	PCM (Pre-Coated Metal)
<b>Cabinet Construction</b>	Stepped-maze frame for enhanced cold retention

## Features

### Drainage Structure

- Wide drainage case frame
- Straight drainage structure

### Included Accessories

Defrost Shovel
