

Curved Pruning Saw with High Carbon Steel Blade

This curved pruning saw features a high carbon steel blade for efficient branch and limb cutting. It has a durable handle and aggressive tooth pattern for fast cutting in tight spaces.

Product Overview

Professional Grade Pruning Saw

This curved pruning saw is engineered for high-efficiency cutting of branches and limbs in professional landscaping and arboriculture. Featuring a robust high carbon steel blade and an aggressive tooth pattern, it facilitates fast and clean cutting action. The specialized curved profile enables users to navigate tight spaces easily while maintaining optimal ergonomic cutting angles.

Technical Specifications

Blade Material	High Carbon Steel
Blade Profile	Curved
Suitable Uses	Professional Arboriculture, Home Gardening, Landscaping, Branch Pruning

Key Features

Design Advantages

- Aggressive tooth pattern for rapid material removal
- Ergonomic handle designed for comfort during extended use
- Curved geometry for reach in confined spaces
- High-durability construction for heavy-duty limb cutting
