

Cushioned Metal Clamp for Pipes and Hoses

This cushioned clamp is designed to secure pipes, tubes, or hoses. It features a metal band lined with a rubber or elastomer cushion to absorb vibration and prevent damage to the clamped object.

Product Overview

Industrial Cushioned Pipe Clamp

This industrial-grade cushioned metal clamp is designed to securely fasten pipes, tubes, and hoses while minimizing mechanical stress. Featuring a robust metal band lined with a high-quality elastomer cushion, it effectively absorbs vibration and protects the surface of the clamped object from abrasion. The integration of mounting tabs with elongated holes ensures a versatile and straightforward installation process across various industrial and commercial piping systems.

Technical Specifications

Key Features

- Vibration absorption
- Surface damage prevention
- Easy installation design
- Secure pipe retention

Vibration Damping	Yes
Cushion Material	Rubber, Elastomer
Mounting Method	Elongated mounting tabs
