

Custom Bend Metal Clip

These custom bend metal clips are precision-engineered for diverse applications. The clips are manufactured using high-quality metals, ensuring durability and reliable performance.

Product Overview

Precision Engineered Metal Clips

These custom bend metal clips are precision-engineered to meet demanding fastening and mounting requirements across various industrial applications. Manufactured using high-quality metals, they offer exceptional durability and reliable performance for electrical connections and component securing. With diverse design configurations available, including various arm lengths and mounting hole patterns, these clips provide versatile solutions for custom metal hardware needs.

Manufacturing Capabilities

Production Equipment Highlights

160 people

Total Employees

115 units

Processing Equipment Sets

160 T

Precision Press Capacity

Stamping & Forming Processes

Deep Drawing, Extruding, Piercing, Coining, Reverse Burring, Blanking, Forming, Embossing

Applications

Common Use Cases

- Electrical component connections
- Automotive sensor signal wheels
- EPS Steering Motor housings
- Lithium-ion battery housings
- Printer and copier hardware
- General fastening and securing

Quality & Compliance

Customization

OEM Available • Custom Design • Precision Stamping
