

Custom Laser Cut Sheet Metal Parts

Precision-engineered sheet metal components are manufactured using advanced laser cutting techniques. These parts are designed for various industrial applications, offering high accuracy and durability.

Product Overview

Precision-Engineered Sheet Metal Solutions

We specialize in high-precision sheet metal fabrication and laser cutting services tailored to OEM specifications. Our advanced manufacturing capabilities enable us to produce complex components for diverse industrial applications, including forklift accessories, HVAC parts, and automotive assemblies. With a commitment to quality and durability, we deliver reliable metal parts that meet rigorous professional standards.

Manufacturing Capabilities

Additional Processing

- Mechanical Processing
- Riveting
- Welding
- Sheet Metal Fabrication

Cutting Technologies

Laser Cutting, Flame Cutting, Plasma Cutting

Equipment & Machinery

Processing Equipment

Equipment Type	Details
Laser Cutting	HanKwang Laser
Flame Cutting	Koike
Bending	AMADA (8T, 80T, 150T)
Punching	AMADA (35T, 45T)
Welding	Matsushita Robots
Pressing	YH32-200A Hydraulic
Milling	4ASS
Shearing	QC12Y

Facility Details

Facility Area

6500 sqm

Total Area
