

# Custom Shaped Zinc Plated Rivet Nut

These zinc plated rivet nuts are custom shaped for specialized applications. They provide strong and reliable threads in thin materials where traditional nuts and bolts are unsuitable.

## ADDITIONAL IMAGES

## Product Overview

### Professional Custom-Shaped Rivet Nuts

These custom-shaped, zinc-plated rivet nuts are engineered to provide strong and reliable threaded connections in thin materials. Designed for high-performance industrial applications, they ensure secure fastening where traditional methods are unsuitable. The inclusion of zinc plating significantly enhances corrosion resistance, prolonging the durability of the installation across diverse professional environments.

## Technical Specifications

Surface Finish	Zinc Plated
Product Types	Flat Head, Small Countersunk Head, Hexagonal, Half-Hexagonal

## Quality and Manufacturing

### Quality Assurance

- Automatic optical image screening
- Advanced production equipment
- Automated packaging processes
- Rigorous inspection procedures
