

# Custom Sheet Metal Enclosure

This custom sheet metal enclosure is designed to safeguard internal components in diverse settings. It features ventilation slots, mounting flanges, and a rectangular cutout.

## Product Overview

### Precision Sheet Metal Enclosure

This custom-fabricated sheet metal enclosure is designed to provide robust protection for internal electronic and industrial components. Featuring integrated ventilation slots and precision-engineered mounting flanges, it ensures both structural integrity and efficient heat management. The unit is ideal for demanding applications that require reliable, high-durability protection in a professional environment.

## Technical Specifications

### Production Capabilities

<b>15000 kW</b> Laser Cutting Power	<b>6 m</b> Plate Shearing Capacity
--	---------------------------------------

### Core Processes

Laser Cutting, Sheet Metal Fabrication, Riveting, Welding

## Design Features

### Key Features

- Rectangular top-surface cutouts
- Side ventilation slots for thermal management
- Integrated mounting flanges with pre-drilled holes
- Industrial-grade sheet metal construction

## Manufacturing Details

Manufacturing Scale	6000 sqm
Operating Personnel	39
