

Custom Sheet Metal Fabrication

Custom sheet metal components are fabricated with precision cutting and welded mounting tabs. These parts are manufactured using high-quality materials, ensuring durability and reliability.

Product Overview

Custom Sheet Metal Fabrication Services

Our professional fabrication services offer precision metal processing solutions, including laser cutting, sheet metal bending, and riveting welding. With high-capacity machinery and a focus on high-efficiency production, we provide durable and accurate components for diverse industrial applications. Our products meet international quality standards and are trusted by global corporations across Europe, America, and Asia.

Capabilities

Facility Metrics

6000 sqm
Facility Area

15000 KW
Laser Power

Available Processes

Laser Cutting, Sheet Metal Fabrication, Riveting, Welding

Equipment

Production Machinery

- High-power laser cutting machines
- 4m / 6m plate shearing machines
- Bending machines
- CNC machine tools
