

Cutting Board Sterilizer with Hot Air Drying and UVC Sterilization

This cutting board sterilizer uses 70 °C hot air to dry and deep ultraviolet UVC to sterilize. It has a cockroach control system and can be mounted vertically or on the wall.

ADDITIONAL IMAGES

Overview

A 4-in-1 solution for drying, disinfection, cockroach repellent, and organized storage.

Advanced Kitchen Hygiene Solution

The BDP-AP0101 is a multifunctional cutting board sterilizer designed to maintain a professional-grade hygienic environment in modern kitchens. It combines 70°C hot air circulation drying with deep UVC ultraviolet sterilization to eliminate bacteria from cutting boards, knives, and utensils. Featuring a unique ultrasonic cockroach repellent system and flexible mounting options, it provides a comprehensive storage and disinfection solution for health-conscious households and professional settings.

Core Performance

Key Performance Metrics

70 °C

Drying Temperature

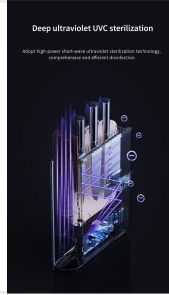

100 W

Rated Power

Sterilization & Drying

Integrated intelligent cockroach control system keeps kitchen utensils clean and safe.

High-power short-wave UVC technology ensures comprehensive and efficient disinfection.

Circulating hot air at 70°C provides all-round drying to prevent bacterial growth.

Sterilization Technology	Deep ultraviolet UVC short-wave radiation
Drying System	70°C hot air circulation with all-round blowing method
Pest Control	Intelligent ultrasonic cockroach repellent system

Design & Installation

Wall hanging and Desktop

- Base sucker structure design.
- Removable wall-mount mounting.

Flexible installation with base suckers for desktop use or removable wall-mount brackets.

Installation Features

- Base sucker structure for stability
- Removable wall-mount mounting
- Inclined internal water outlet to prevent accumulation

Installation Styles	Vertical Desktop, Wall Mounted
----------------------------	--------------------------------

Storage & Organization

Independent disinfection zones for chopping blocks, knives, and cutlery to avoid cross-contamination.

Dedicated Storage Slots

- Chopping blocks
- Kitchen knives
- Chopsticks
- Children's tableware

Independent Operation

Yes
