

Cutting Plotter WK1360

This cutting plotter is designed for cutting materials like vinyl, paper, and heat transfer films. It is suitable for professional sign making, garment decoration, and other applications requiring detailed cuts.

Product Overview

Professional Precision Cutting

The WK1360 cutting plotter is a high-performance machine engineered for precise cutting tasks across various materials including vinyl, paper, and heat transfer films. Built with robust construction, it ensures reliability and consistent results for intensive professional use. Its user-friendly digital control panel allows operators to achieve intricate cuts efficiently, making it an essential tool for sign making and garment decoration.

Technical Capabilities

Performance Metrics

1360 mm
Cutting Width

Compatible Materials

Vinyl, Paper, Heat transfer film

Hardware

Build Quality

- Robust chassis construction
- Reliable drive system
- Precision blade holder

Interface

Digital display and control panel

Applications

Recommended Applications

Sign Making • Garment Decoration • Intricate Cutting
