

Cycling Gloves with Padded Palm

These cycling gloves offer comfort and control for various cycling activities. They feature padded palms to absorb vibration and breathable fabrics for ventilation.

Product Overview

Ergonomic design featuring reinforced palm padding for vibration absorption.

High-Performance Cycling Gloves

These cycling gloves are engineered for professional and enthusiast riders, featuring a padded palm for superior vibration absorption and comfort. The construction utilizes a blend of breathable knitted elastic fabric and durable microfiber to ensure a secure grip and flexibility during long rides. Designed for versatility, they are suitable for road cycling, mountain biking, and various outdoor activities.
