

Cyclone Canister Vacuum Cleaner with HEPA Filter

This cyclone vacuum cleaner features speed control on the body and a transparent front cover. It incorporates a HEPA filter, pedal on/off switch, and an automatic cord rewinder.

Overview

Professional Cyclone Cleaning Performance

The BST-816 is a high-efficiency cyclone canister vacuum designed for rigorous cleaning environments. Featuring advanced filtration technology and user-centric controls, it ensures optimal dust collection and air quality. Its robust build and integrated features, such as automatic cord rewinding and speed regulation, make it a reliable choice for professional maintenance requirements.
