

# Cyclonic Canister Vacuum Cleaner with HEPA Filtration

This canister vacuum utilizes a cyclonic dust separation system and multi-filtration. Washable nylon and HEPA filters, electronic speed control, and an auto cord rewriter are included.

## Overview

### Professional Performance Canister Vacuum

This cyclonic canister vacuum cleaner is engineered for high-efficiency cleaning in professional environments. Featuring advanced HEPA filtration and a powerful cyclonic motor, it ensures thorough debris collection while maintaining air quality. Its versatile design, including a telescopic wand and multiple attachments, allows for superior maneuverability across diverse surface types.

## Performance Metrics

### Key Performance Metrics

<b>1800 W</b> Peak Power	<b>20 Kpa</b> Vacuum Pressure	<b>300 W</b> Suction Power	<b>2.4 M/MIN</b> Airflow
-----------------------------	----------------------------------	-------------------------------	-----------------------------

## Technical Specifications

### Electrical Requirements

Region	Voltage	Frequency
International/EU	220-240V	50Hz
North America	100-120V	60Hz

Operational Noise	78 dBA
-------------------	--------

## Design and Capacity

Dust Tank Capacity	2 L
Filtration System	HEPA Filtration, Cyclonic Action
