

Cylinder Bed Lockstitch Sewing Machine with Unison Feed

This industrial sewing machine features a cylinder bed design for sewing tubular or curved items. It is equipped with a unison feed mechanism, ensuring consistent and even feeding of multiple layers of material.

Product Overview

Cylinder Bed Lockstitch Machine

This industrial-grade cylinder bed lockstitch sewing machine is engineered for precision and durability. Featuring a unison feed mechanism—utilizing needle, presser foot, and feed dog—it ensures consistent material handling for complex, multi-layered projects. The cylinder bed design is specifically optimized for sewing tubular or curved items, making it an essential tool for leather goods, bags, and automotive upholstery.

Technical Specifications

Feed Type	Unison Feed (Needle, Presser Foot, Feed Dog)
Hook Assembly	Large Vertical Big Hook
Stitch Length Adjustment	Lever-type system
Drive Mechanism	Synchronous cog belt with bearing-supported axles

Applications

Primary Applications	Leather Goods, Bags, Washers, Tubular Items, Curved Seaming
