

Cylinder Head for Small Internal Combustion Engines

This cylinder head is designed for small internal combustion engines. It features ports for intake and exhaust, and a central bore for the cylinder.

Product Overview

High-Performance Cylinder Head

This precision-engineered cylinder head is designed for small internal combustion engines, such as those found in motorcycles and small power equipment. Crafted from durable aluminum, it features optimized intake and exhaust ports to ensure efficient airflow and combustion performance. The robust construction is built to withstand the high temperatures and pressures inherent in single-cylinder engine operation.

Technical Specifications

Material

Aluminum Alloy

Ports

- Intake Port
- Exhaust Port

Compatibility

Single-cylinder internal combustion engines

Model ID

C70

Mounting & Assembly

Threaded Spark Plug Hole, Bolt Mounting Points
