

Cylinder Head Gasket for Engines

This cylinder head gasket provides a reliable seal between the cylinder head and engine block. Constructed from durable materials, it withstands high temperatures and pressures for optimal combustion and leak prevention.

Product Overview

High-Performance Engine Sealing

This cylinder head gasket is designed to provide a reliable seal between the cylinder head and engine block, ensuring optimal combustion and preventing leaks. Constructed from durable, multi-layered materials, it is engineered to withstand high temperatures and pressures. With reinforced sealing rings and precision-cut openings, this component is essential for maintaining engine performance and longevity during rebuilds and repairs.

Technical Specifications

Construction Features

- Multi-layer construction
- Reinforced sealing rings
- Precision-cut openings
- Strategically placed sealing beads

Part Identification

EK, 066 721
