

Cylinder Key for Industrial Machinery

Cylinder keys designed for use in machinery and industrial applications. These keys provide a secure locking mechanism for various equipment.

Product Overview

Industrial Cylinder Key Solutions

This set of cylinder keys is engineered for critical applications in industrial machinery, with a primary focus on apparel and textile manufacturing equipment. The kit includes three distinct key designs, ensuring compatibility with various locking mechanisms and control systems. Designed for durability and precise operation, these keys facilitate reliable maintenance and access control for industrial hardware.

Key Specifications

Included Models

- CK01 (T-shaped, Copper-colored)
- CK02 (T-shaped, Silver-colored)
- CK03 (L-shaped, Black)

Primary Application

Apparel Machinery, Textile Machinery, Industrial Hardware

Quantity per Set

3
