

# Cylinder Liner Kit for Diesel Engine

This cylinder liner kit is designed for diesel engines. It provides a durable and reliable solution for engine maintenance.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Cylinder Liner Kit

This precision-engineered cylinder liner kit is specifically designed for K4100D diesel engines, offering exceptional durability and reliability for demanding applications. Each kit includes essential components such as the cylinder liner, piston, piston rings, piston pin, and retaining clips, all manufactured to meet strict quality standards. Designed to withstand high temperatures and pressures, this kit ensures optimal engine efficiency, reduced friction, and an extended service life for agricultural machinery and other heavy-duty diesel equipment.

## Compatibility & Application

Engineered for reliable operation in demanding agricultural machinery.

<b>Compatible Engine Model</b>	K4100D
<b>Typical Applications</b>	Agricultural Machinery, Diesel Engine Repair, Engine Overhaul

## Technical Specifications

Complete set of high-quality components for K4100D engine rebuilds.

### Included Components

- Cylinder Liner
- Piston
- Piston Rings (Compression & Oil Control)
- Piston Pin
- Retaining Clips
- Water Seals

### Packaging Dimensions

280 x 280 x 300 mm

## Quality Standards

Precision-engineered parts designed for durability and optimal sealing.

### Key Performance Features

Precision Machined • High-Temperature Resistant • Wear-Resistant Surface • OEM Specification Standards
