

Cylindrical Electronic Sensor with Cable

This product is a cylindrical electronic sensor equipped with a cable. It is designed for use in monitoring and communication systems.

Product Overview

Reliable Cylindrical Sensor

This cylindrical electronic sensor is designed for integration into monitoring and communication systems. Featuring a durable white housing and a pre-attached cable, it offers a straightforward installation process for industrial applications. The compact design ensures compatibility with various setups where space is at a premium.

Physical Characteristics

Housing Shape	Cylindrical
Housing Color	White

Connectivity

Connection Method	Hardwired Cable
