

Cylindrical LED Work Light with Magnetic Base

This LED work light provides bright illumination for various tasks. Its cylindrical design includes a textured grip and a magnetic base for stable placement on metallic surfaces.

Product Overview

Versatile LED Work Light

This cylindrical LED work light is designed for professionals needing reliable illumination in tight spaces. Featuring a high-output COB bulb and a secondary top-mounted blue LED, it offers versatile lighting modes for various tasks. With its integrated magnetic base and hook, it provides hands-free operation, making it an essential tool for automotive repair, diagnostics, and general maintenance work.

Technical Specifications

Light Output	300 lumens
Bulb Type	COB LED with top blue LED

Power & Battery

Battery Voltage	3.7 V
Battery Chemistry	Lithium
Charging Time	4 hours

Performance

Runtime by Mode

Mode	Runtime
Side Light (High)	2 hours
Side Light (Low)	4 hours
Head Light	3 hours

Features

Included Accessories

- USB charging cable (1 meter)

Mounting Options	Magnetic Base, Integrated Hook
