

Cylindrical Lithium Battery

Cylindrical lithium batteries provide a reliable power source for various devices. These batteries have a voltage of 3.6V and come in models ER26500 and ER14505.

Product Overview

High-Performance Cylindrical Lithium Batteries

These cylindrical lithium batteries are engineered for reliability and consistent power delivery in demanding industrial applications. With a standard voltage of 3.6V, they are suitable for a wide range of electronic devices and specialized equipment. The series includes multiple form factors, providing versatility for various design requirements.

Technical Specifications

Nominal Voltage

3.6 V

Voltage

Available Models

- ER26500
- ER17505
- ER14505
- ER10450

Battery Chemistry

Lithium • Cylindrical
