

Cylindrical Metal Torch with Multiple Modes

This is a cylindrical torch designed for general illumination purposes. It features a robust metal body and multiple modes controlled by a switch and a red button.

Product Overview

Versatile Cylindrical Illumination

This cylindrical metal torch is engineered for durability and reliable performance in professional environments. Featuring an ergonomic design with integrated switching controls, it provides multiple lighting modes to adapt to varying visibility requirements. Its robust construction ensures long-term utility for high-demand industrial and general illumination tasks.

Physical Properties

Material	Metal
Design	Cylindrical with widened head

Technical Specifications

Controls

- Standard switch
- Dedicated function button (Red)

Operation Modes	Multiple Modes, Switch Controlled
Power Source	Battery Powered
