

Cylindrical Roller Bearing NU2209 N211 NJ412NJP NUP NJ NN NF Series

These cylindrical roller bearings are designed for high speeds and offer robust operation. The inner ring accommodates radial loads, and the separable design allows for easy installation.

Overview

High-Performance Roller Bearings

These cylindrical roller bearings are engineered for demanding industrial applications requiring exceptional load-carrying capacity and durability. Designed to meet rigorous performance standards, they provide consistent reliability for various types of industrial machinery and heavy-duty equipment.

Product Type	Cylindrical Roller Bearing
Quality Standards	ISO 9001:2008

Available Series

Available Bearing Series

- NU Series
- NJ Series
- NUP Series
- N Series
- NF Series
- NN Series

Model Range

Sample Model Numbers

Series	Example Models
NU	NU203, NU305, NU2207, NU408
NJ	NJ305, NJ2219, NJ310, NJ2840
NUP	NUP212, NUP203, NUP2207, NUP2315
N	N317, N324, N214, N307
NF	NF310, NF307, NF19/600
