

Cylindrical Stainless Steel Tank

This cylindrical tank is made of stainless steel. It features a smooth, reflective surface and a flat base for stable placement.

Product Overview

High-Quality Stainless Steel Solutions

This cylindrical stainless steel tank is engineered for the reliable containment of liquids and various industrial materials. Crafted from premium stainless steel, the vessel offers exceptional durability and robust resistance to corrosion, making it ideal for diverse professional environments. Its polished, reflective surface and stable flat base ensure both aesthetic appeal and practical integration into your existing operational setup.

Technical Specifications

Design Features

- Cylindrical shape
- Polished reflective surface
- Top circular opening
- Flat stable base

Material Type	Stainless Steel
