Product Overview

Professional UV Disinfection Solution

This cylindrical UV disinfection lamp is engineered to provide efficient sterilization and mite removal in compact spaces. Featuring a robust protective cage design, it ensures both user safety and maximum UV light exposure for effective microorganism elimination. Its minimalist aesthetic and single-button operation make it a practical tool for maintaining hygienic professional or domestic environments.

Physical Dimensions

Height	126 mm
Diameter	68 mm

Design Features

Safety Features	Protective Cage, Cylindrical Design
Control Method	Single button operation

Applications

Primary Applications

- Sterilization
- Disinfection
- Mite removal
- Small space hygiene
