Product Overview

High-Performance Alkaline Power

These D-size alkaline batteries are engineered for maximum energy density and consistent power delivery in both high and low-drain devices. Featuring advanced leakage protection and a robust sealing structure, they ensure the safety of your equipment during use and storage. With a 7-year shelf life guarantee, these batteries provide a reliable, long-lasting energy solution for professional and everyday applications.

Technical Specifications

Key Performance Metrics

| | |
|--------------------------------------|------------------------------|
| 8 x Capacity vs Heavy Duty | 7 years Shelf Life |
|--------------------------------------|------------------------------|

| | |
|--------------|----------|
| Battery Size | D (LR20) |
| Voltage | 1.5 V |
| Storage Life | 7 years |

Compliance & Safety

Material Composition

Mercury-Free • Cadmium-Free • Lead-Free

| | |
|-------------------------|--|
| Environmental Standards | Directive 2006/66/EC, Directive 94/62/EC |
|-------------------------|--|

Features

Core Advantages

- Leak-proof sealing structure
- High-density cell technology
- Compatible with high and low drain devices
- Long-lasting power retention
