

D Size Carbon Zinc Battery

These D size carbon zinc batteries deliver reliable power for various devices. They offer a 1.5V output and are suitable for toys, radios, and other household electronics.

Product Overview

Reliable Power Solution

These D-size carbon-zinc batteries are engineered to provide consistent and reliable power for a variety of everyday household devices. Designed with safety and performance in mind, they offer a standard 1.5V output suitable for electronics such as radios, toys, and other low-drain applications. Their durable construction ensures long-lasting operation for your essential equipment.

Technical Specifications

Battery Size	D
Nominal Voltage	1.5 V
Chemistry	Carbon Zinc

Safety & Compliance

Safety Warnings

- Keep away from small children
- Do not ingest
- Follow proper disposal guidelines

Applications

Recommended Applications	Toys, Radios, Household Electronics, Low-drain Devices
