

D2S Automotive HID Bulb

High-intensity discharge (HID) lamp designed for automotive headlights. It uses a clear quartz glass envelope containing xenon gas and metal halide salts.

Product Overview

High-Performance HID Lighting

The D2S Automotive HID Bulb is a high-intensity discharge lamp engineered for superior brightness in automotive headlight assemblies. Constructed with a clear quartz glass envelope containing a precise mixture of xenon gas and metal halide salts, this bulb ensures reliable illumination. It features a durable black plastic base with integrated metal retaining clips for secure and straightforward installation.

Technical Details

Bulb Type	D2S
Technology	High-Intensity Discharge (HID)

Construction

Envelope Material	Clear Quartz Glass
Gas Composition	Xenon Gas, Metal Halide Salts

Installation

Base Material	Black Plastic
Mounting Mechanism	Metal Retaining Clips
