

Data Transmission Network Communication Device

This network communication device is designed for robust data transmission and signal processing. It features multiple interface ports, status indicator LEDs, and a ruggedized enclosure.

Product Overview

Robust Network Communication Solution

This specialized network communication device is engineered for reliable data transmission and precise signal processing in demanding environments. Featuring a ruggedized enclosure, it is built to withstand rigorous operational conditions while maintaining consistent performance. The device is equipped with multiple interface ports and status indicator LEDs, facilitating seamless integration into complex network infrastructures that prioritize high availability and secure communication.

Technical Specifications

JITC Compliance

JITC Certified

Part Number	D06012-A
Manufacture Date	09/16/02

Operational Indicators

Status Indicators

- ACK (Acknowledge)
- RXD (Receive Data)
- TXD (Transmit Data)

Key Features

Design Features	Ruggedized Enclosure, Signal Processing, Multi-Interface Ports, Real-time Monitoring
