Overview

Heavy-duty construction-grade safety alarm unit.

Heavy-Duty Safety Reversing Alarm

This robust safety reversing alarm is engineered for reliable performance in demanding industrial and construction environments. Designed for compatibility with trucks, forklifts, and heavy equipment, it operates on a wide 12-48V DC voltage range. The unit features dual sound output levels and durable, weather-resistant construction to ensure clear, effective warnings in noisy workspaces.

Technical Specifications

Sound Levels

97 dB

Low Output

107 dB

High Output

IP Rating

IP56 • Dustproof • Waterproof

Operating Voltage

12-48V DC

Sound Options

White Noise, Squawk, Quack, BeeBee

Power Consumption

15 Watts / 250mA

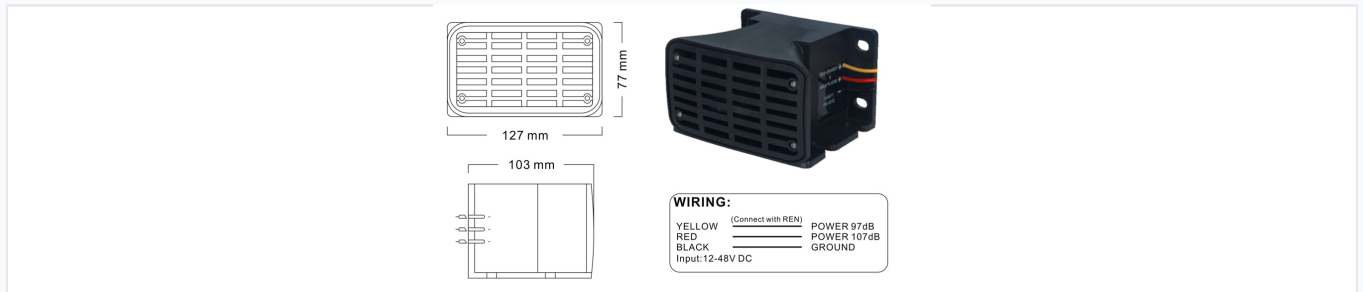

Dimensions

77H x 127W x 103D mm

Material

Nylon

Wiring Configuration

Technical diagram illustrating wire connections and physical dimensions.

Wiring Guide

Wire Color	Function
Red	Power (107dB)
Yellow + Red	Power (97dB)
Black	Ground

Commercial Terms

Warranty

12 months

Customization

Custom color box available for orders over 1000 pcs
