

DC 12-80V 107 dB Vehicle Backup Alarm

This DC 12-80V vehicle backup alarm provides a clear audible warning with a 107 dB output. It is designed to enhance safety for vehicles like cars and forklifts when reversing.

ADDITIONAL IMAGES

Overview

High-performance alarm suitable for forklifts and heavy-duty automotive applications.

High-Performance Vehicle Backup Alarm

This versatile backup alarm is engineered for safety in demanding industrial and automotive environments, including forklifts and heavy machinery. It features a wide multi-voltage operating range of 12-80V DC and delivers a powerful 107 dB warning signal to ensure clear audibility. The unit is built with an epoxy-encapsulated housing, making it fully weather-proof and pressure-washable for long-term reliability in extreme temperatures.

Technical Specifications

Durable, epoxy-encapsulated housing designed for extreme industrial environments.

Connection Options

- Wire lead
- Stud connection

Operating Voltage	12-80V DC
Sound Level	107 dB
Operating Temperature	-30°C to 77°C
Protection Features	Weather-proof, Pressure washable, Reverse polarity protected, Epoxy encapsulated
