

DC 12V Lead-Acid Battery Charger Series

These battery chargers are designed for various DC12V lead-acid batteries. They offer multiple protections including overheating, short circuit, and over-current protection.

Product Overview

Professional Lead-Acid Battery Charger Series

This series of high-efficiency battery chargers is engineered for reliable performance with various DC12V lead-acid batteries. Designed with safety as a priority, each unit incorporates automated protection systems against overheating, short circuits, and over-current conditions. These versatile chargers are suitable for a wide range of battery capacities, making them an ideal solution for professional automotive and industrial charging needs.

Key Features

Safety & Performance

Overheating Protection, Short Circuit Protection, Over-current Protection, Automated Charging, High Efficiency

Technical Specifications

Model Comparison

Model	Power	Max Current	Capacity Range
WJ-MCBC1202	24W	2A	12-35Ah
WJ-MCBC1206DV	72W	6A	20-120Ah
WJ-BC1206	72W	6A	240Ah
WJ-BC124	48W	2.8A	15-60Ah
WJ-BC08A	96W	8A	9-118Ah

Electrical Requirements

Input Voltage

- AC220V-240V / 50Hz
- AC110V-130V / 60Hz

Output Voltage

DC12V • DC6V/12V

Physical Attributes

Cable Lengths

1.4 M

Charging Line

1.8 M

Power Cord

Enclosure Material

Plastic Shell
