

DC Cooling Fan

This DC fan is engineered for optimal cooling performance in computers and electronics. Its durable construction and efficient blade design ensure high airflow and low noise.

Product Overview

High-Performance DC Cooling Fan

This DC cooling fan is engineered for reliable thermal management in electronic devices and computer systems. Constructed with durable, high-quality PBT plastic materials, it ensures long-lasting performance and structural integrity. Its efficient design promotes optimal airflow, making it an ideal solution for CPU coolers, power supply units, and general case ventilation.

Physical Specifications

Fan Size	80mm x 80mm
Material	PBT UL94V-0 Plastic

Technical Details

Connection Mode	Lead type
