

# DC Gear Motor 24V with Splined Output Shaft

This 24V DC gear motor features a robust gearbox and a splined output shaft. It is ideal for applications requiring high torque at low speeds.

## ADDITIONAL IMAGES

## Product Overview

### High-Torque DC Gear Motor

This brushed DC gear motor is engineered for reliability in demanding electromechanical applications. Featuring a robust metal gearbox and a splined output shaft, it delivers high torque at controlled speeds, making it an ideal choice for automation, robotics, and precision machinery. Its compact design includes a secure mounting flange, ensuring easy integration into various systems.

## Electrical Specifications

### No-Load Speed

**60 RPM**

No-Load Speed

### Rated Voltage

24 V

## Mechanical Specifications

### Stall Torque

**10 kg-cm**

Stall Torque

### Output Shaft Type

Splined

### Construction Features

Brushed DC Motor, Metal Gearbox, Compact Design, Mounting Flange

## Identification

### Model Identifiers

- PGM-W63-14-001
- PCM-W63-14-001
- P160905D2-2
